ABOUT MOTION-S

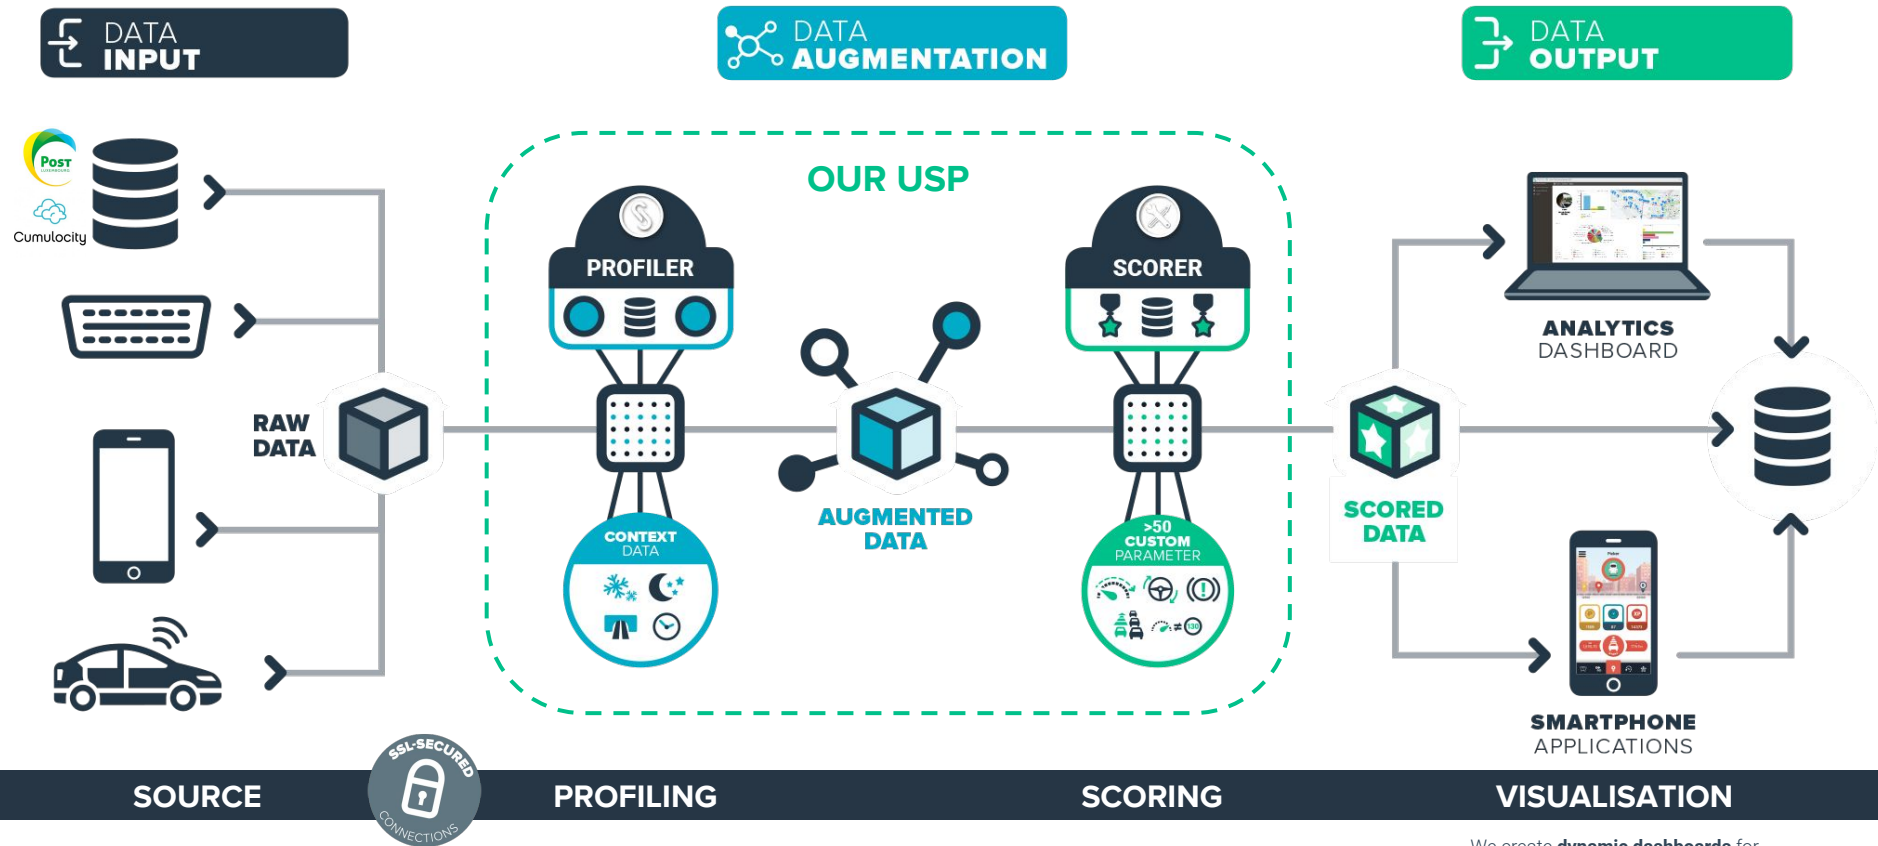

5 MOBILE APPS LAUNCHED

13.500+ profiles • 1.000.000+ Trips
15.000.000+ km • EU, US, MEX, UAE

OUR BUSINESS MODEL

STORED or LIVE GPS, sensor and car data provided by any device (smartphones, dongles, CAN bus)

We contextualize and profile the data on our Profiling Platform.

The augmented data gets correlated with individual risk factors and predictive models on our Scoring Platform.

We create dynamic dashboards for advanced data visualisation to assist decision making and smartphone apps to provide feedback to drivers

PLATFORM **AND** METHODOLOGY

MEASURING RISK WITH TELEMATICS

Approach: From subjective to objective scoring

MEASURABLE CONTRIBUTORY FACTORS - STAT19

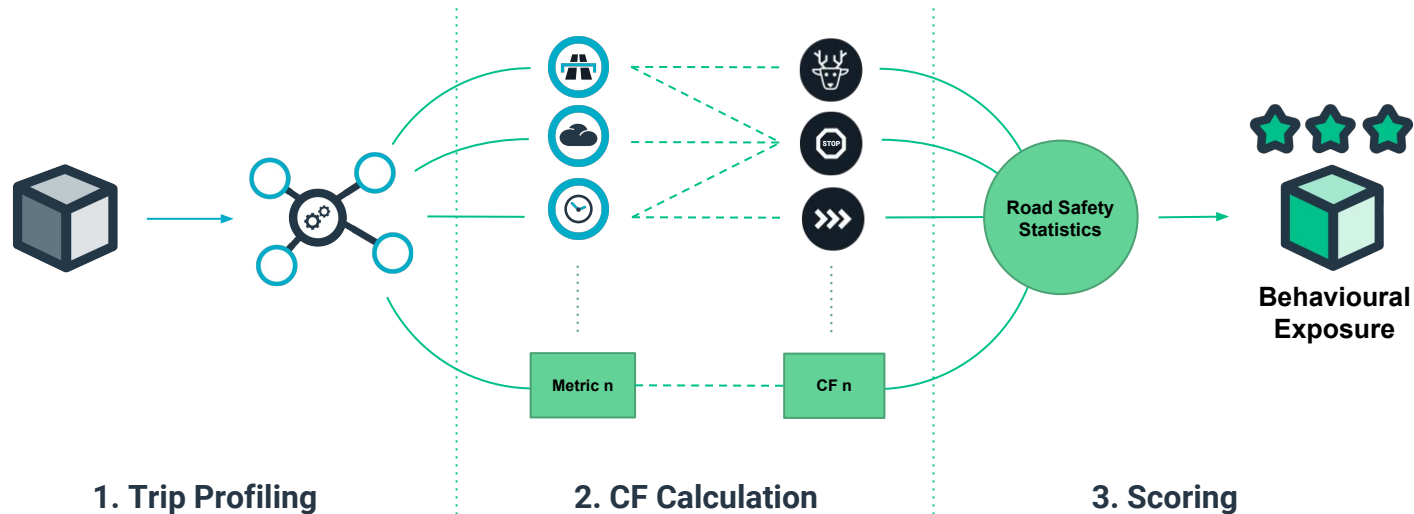

Road Environment Contributed		103	102	101	110	108	107	109	104	105	106
		Slippery road (due to weather)	Deposit on road (e.g. oil, mud, chippings)	Poor or defective road surface	Sunken, raised or slippery inspection cover	Road layout (e.g. bend, hill, narrow carriageway)	Temporary road layout (e.g. contraflow)	Animal or object in carriageway	Inadequate or masked signs or road markings	Defective traffic signals	Traffic calming (e.g. speed cushions, road humps, chicanes)
Vehicle Defects		201	202	203	204	205	206				
		Tyres illegal, defective or under-inflated	Defective lights or indicators	Defective brakes	Defective steering or suspension	Defective or missing mirrors	Overloaded or poorly loaded vehicle or trailer				
Driver/Rider Only (Includes Pedal Cycles and Horse Riders)	Injudicious Action	308	306	302	301	307	310	305	304	309	303
		Following too close	Exceeding speed limit	Disobeyed Give Way or Stop sign or markings	Disobeyed automatic traffic signal	Travelling too fast for conditions	Cyclist entering road from pavement	Illegal turn or direction of travel	Disobeyed pedestrian crossing facility	Vehicle travelling along pavement	Disobeyed double white lines
	Driver/ Rider Error or Reaction	405	406	403	408	409	401	402	404	407	410
		Failed to look properly	Failed to judge other person's path or speed	Poor turn or manoeuvre	Sudden braking	Swerved	Junction overshoot	Junction restart (moving off at junction)	Failed to signal or misleading signal	Too close to cyclist, horse or pedestrian	Loss of control
	Impairment or Distraction	501	502	508	503	509	510	505	504	507	506
		Impaired by alcohol	Impaired by drugs (illicit or medicinal)	Driver using mobile phone	Fatigue	Distraction in vehicle	Distraction outside vehicle	Illness or disability, mental or physical	Uncorrected, defective eyesight	Rider wearing dark clothing	Not displaying lights at night or in poor visibility
Behaviour or Inexperience		602	605	601	603	607	606	604			
		Careless, reckless or in a hurry	Learner or inexperienced driver/rider	Aggressive driving	Nervous, uncertain or panic	Unfamiliar with model of vehicle	Inexperience of driving on the left	Driving too slow for conditions or slow vehicle (e.g. tractor)			
Vision Affected by		701	703	706	707	708	705	710	702	704	709
		Stationary or parked vehicle(s)	Road layout (e.g. bend, winding road, hill crest)	Dazzling sun	Rain, sleet, snow or fog	Spray from other vehicles	Dazzling headlights	Vehicle blind spot	Vegetation	Buildings, road signs, street furniture	Visor or windscreen dirty, scratched or frosted etc.
Pedestrian Only (Casualty or Uninjured)		802	808	803	801	806	807	805	804	809	810
		Failed to look properly	Careless, reckless or in a hurry	Failed to judge vehicle's path or speed	Crossing road masked by stationary or parked vehicle	Impaired by alcohol	Impaired by drugs (illicit or medicinal)	Dangerous action in carriageway (e.g. playing)	Wrong use of pedestrian crossing facility	Pedestrian wearing dark clothing at night	Disability or illness, mental or physical

60%
of reported accidents
with 22 CFs

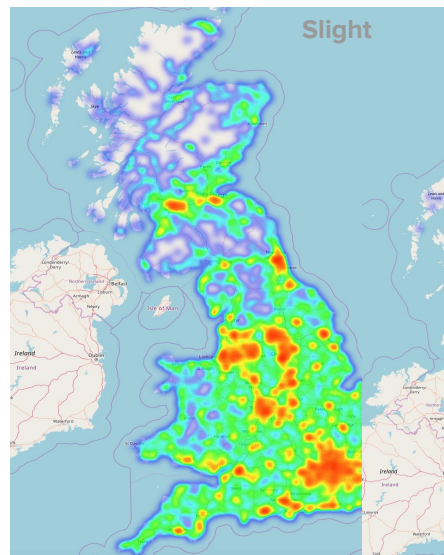

GPS + Augmentation
GPS + Car + Augmentation

RISK ASSESSMENT

- The concept: **Reconstructing the CF form with Telematics**
 - Measure exposure to CF through Telematics Metrics
 - For each trip, calculate Telematics Metrics and decide which CF would have been triggered
 - Use the distribution of accidents per contributory factors to come out with a dist score

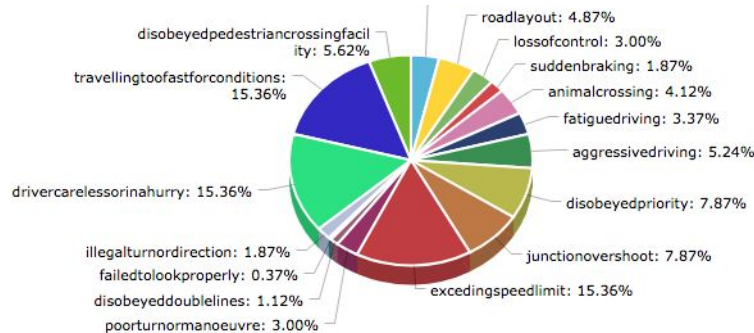

TEMPORAL AND SPATIAL FACTORS (UK EXAMPLE)

BEST AND WORST DRIVERS

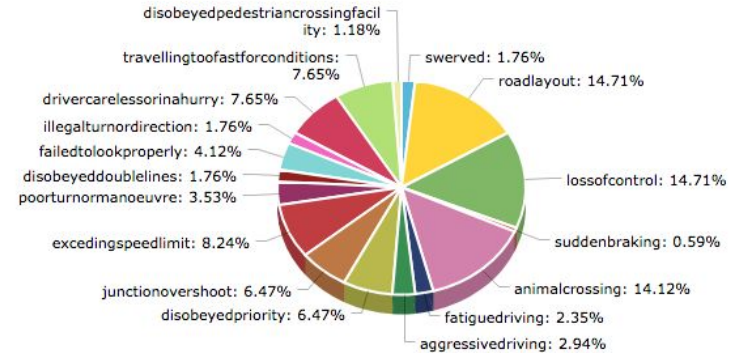

Best participant

-56% from avg fleet risk (1.600 km driven)

Worst participant

+136% from avg fleet risk (2.237 km driven)

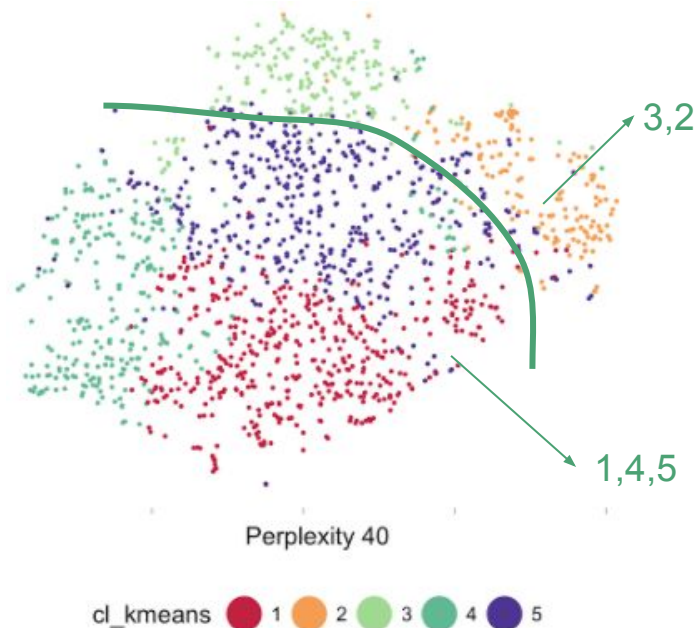

Difference in **score** is mainly generated by **CF** and **road distribution of Worst Participant** being present in **26% more of fatal accidents**

CLUSTERING OF DRIVING PATTERNS

- Use telematics metrics to find groups of drivers according to their driving patterns
- **1.580** drivers from our DBs- **162.145** trips - **85** trips per driver (median)

Visualization with t-SNE

Cluster ID	Number of drivers	Interpretation
1	462	Respect speed limits, soft driving maneuvers.
2	154	Harsh braking close to traffic signs, aggressive driving.
3	186	Disrespect speed limits, sensation seeking (traffic and curves speeding), aggressive driving.
4	284	Soft driving maneuvers, moderate to low values on other TM.
5	446	Do not present extreme values on TM.
